Sure – let's talk more on September 3. I can definitely let you know different things we've been considering and if you have other information that we should know about that, that would be helpful.

Re: a GIS layer, I talked with Steve yesterday and thought he might be able to send us a file but haven't gotten anything from him yet. Maybe it was just a JPEG that he had. If that's the case, I'll just use that. Don was interested in getting some info on the overlay between the coastal nonpoint area and 303(d) listed waters, especially for bacteria, temperature and nutrient-related parameters. I'm going to ask our GIS folks to do that unless you have that readily on hand.

Hi Jenny – thanks for the message about ODA and ODF. Let's touch base about this on our Sept 3rd call. Mostly I'm curious to know how the recent court ruling on buffers affects this measure.

Also – I haven't been successful at finding a GIS layer of the area. I haven't gotten a "no" from our GIS person yet, but I'm doubtful that he'll find one. So far all we've dug up are graphics/jpgs. Do you want those?

Karen

Subject: GIS layer for coastal nonpoint management area

Hi Karen – I was wondering if you could send me the GIS layer for the coastal nonpoint management area that you sent to us in your recent submissions. We're trying to tie up different parts of the CZARA action.

Thanks,

Jenny Wu
